

Neighborhood Environmental Watch How to become a “River Watcher”

Please join the Waccamaw Riverkeeper for this 6 week education program, designed to raise citizen’s knowledge and awareness of the current state of the river so that participants may become more effective stewards of their watershed. Training will be provided in basic water quality science and watersheds, environmental laws, and neighborhood environmental watch basics.

We invite you to become more knowledgeable of and involved in the health of the watershed where you live, work, and play.
